Digital Records Preparation Checklist

This checklist is to assist local records managers in the preparation of electronic records to be transferred to the State Archives for imaging or for permanent retention in the State Archives. Please complete the checklist prior to transfer of records.

- Digital records are uncompressed single-page TIFFs, PDFs, or PDF/As.
- Digital records were reviewed for accuracy; page numbers, volume, and book numbers, and dates match the printed records.
- Digital records cover at least one year or are complete books.
- File names are no longer than 20 characters and are alphanumeric with no special characters and no blank spaces.
- Files are named so that a computer sorts the files in proper page number or date order of the records, i.e. the same order as the paper records. Consult the State Archives' *Best Practices for File Naming*
- Digital records are grouped together in folders by record type, then by volume or year. The parent folder is named for the type of record. Subfolders are named for the year or the volume. The folder structure is no more than 2 levels.
- Digital records are bagged using Library of Congress' Bagger software.
- Digital records are compressed into .zip files.
- A Local Government Electronic Transfers form is completed.

FOR INTERNAL USE ONLY

	Name	Date
Records received		
Bag list verified		
Records sent to imaging unit		
Records validated		
Fixity check before quarantine		
Virus check before quarantine		
Fixity check after quarantine
